Professional Summary

A dedicated and resourceful Computer Science professional with hands-on experience in IT support, quality assurance, digital banking operations, client service, network operations, and motion design. Adept at troubleshooting complex technical issues, managing project workflows, and delivering reliable system performance across diverse environments. Skilled in problem-solving, communication, and technical implementation, with a proven ability to work effectively both independently and within cross-functional teams. Proficient in remote collaboration tools such as Google Meet and Zoho Cliq, with a strong ability to contribute meaningfully in distributed team environments.

Skills

- **Programming:** Python, JavaScript
- **Web Technologies:** HTML, CSS, Tailwind
- **Databases:** SQL
- **Tools:** Git, VS Code, Jitter, Figma
- **Other:** Networking (VPNs, VLANs), Troubleshooting, Motion Design,
- **DevOps & Cloud:**
 - Linux, Bash Scripting, Git, GitHub, Vagrant, VirtualBox,
 - Apache, Nginx, CI/CD Fundamentals, AWS Fundamentals
- Strong Communication & Interpersonal Skills
- Research & Analytical Skills
- Leadership & Team Collaboration
- Organizational Development
- Data Collection & Reporting

Experience

IT Support, QA Specialist & Project Manager

Ideation Platform, Lagos, Nigeria — 01/26 – Present

- Co-managed and successfully delivered project tasks across multiple client engagements as assistant project lead, including [CBC Site](#) (a website developed for the Calgary Black Chambers, a Canadian not-for-profit organization dedicated to empowering Black professionals and youth in Calgary through mentorship, scholarships, and community development) and [Lab2Doctors](#) (a medical service platform designed to connect patients with healthcare professionals), coordinating team activities, tracking milestones, and ensuring timely delivery within scope and requirements.
- Conducted comprehensive web application testing across multiple user roles (admin, member, and guest) on platforms including [Lab2Doctors](#), identifying and reporting critical bugs that improved overall product stability before release.
- Validated application features in [Teleios Health](#) against business and technical requirements, ensuring all deployments met quality standards and delivered a seamless user experience across devices and browsers.
- Delivered consistent IT support by diagnosing and resolving hardware, software, and system issues, resulting in improved operational uptime to 90% and reduced resolution time across the team.

Freelance IT Support & Portfolio Development

Self-Employed, Lagos, Nigeria — 11/25 – 01/26

- Managed standalone tech support contracts and resolved localized hardware, software, and application compatibility issues during employment transition.
- Designed and configured localized development environments, gaining hands-on portfolio experience with multi-VM architectures (Ubuntu/CentOS via Vagrant) and standalone relational database configurations.

Software Engineering Intern

OurPass Digital Bank — 05/25 – 11/25

- Building user interfaces, designing web pages, and ensuring responsive design across devices.
- Building servers, databases, APIs, and handling business logic and data processing.
- Ensured timely resolution of client requests.

Community Development Service — Technical Support Officer (NYSC)

Eti-Osa Local Government, Lagos — 06/24 – 05/25

- Served as lead technical support officer for local community outreach programs, establishing workstation environments and managing network connectivity.
- Ran a Tech Awareness Program for secondary schools in Eti-Osa Local Government, Victoria Island, teaching students basic computer and digital skills.

- Helped organize workshops and practical sessions to make learning technology fun and accessible.
- Supported local community projects focused on digital literacy and simple IT solutions.

Network Operations Intern

Tizeti Network Limited, Lagos, Nigeria — 07/22 – 11/22

- Supported configuration of routers, switches, firewalls, VPNs, and VLANs for hundreds of users and maintained 99% uptime during peak service.
- Monitored network performance using tools such as Wireshark and Nagios.
- Troubleshoot connectivity issues to maintain uptime.

Education

West African Senior School Certificate (WASSCE)

Marist Brothers' Juniorate, Uturu, Abia State, Nigeria — 09/11 – 06/17

Bachelor of Science in Computer Science

University of Nigeria, Nsukka — 09/19 — 03/2024

- Relevant Coursework: Algorithms, Data Structures, Machine Learning, Database Management, Web Development, Advanced Computer Networks, Network Security.

Projects

- [Personal Portfolio Website](#): Built a responsive portfolio website using HTML, CSS, and JavaScript to showcase personal projects.
- **Ad Video with Jitter Animation**: Created a dynamic advertisement video using jitter effects to animate graphics and text, enhancing visual engagement. Gained practical experience in motion design and video editing for digital media projects.
- **E-Commerce Website**: Developed a functional, responsive e-commerce website that facilitates buyer-seller interaction.
- **Solar-Powered Base Station and Wi-Fi Deployment for Rural Connectivity**: Worked with a team to set up a solar-powered base station and Wi-Fi network to bring internet access to a rural community. Assisted in configuring the wireless network and optimizing coverage for stable connectivity.
